3. After section 91 of the said Act, the following sections shall be inserted, namely :—

Insertion of new sections 91A and 91B in Indian Companies Act, 1913.

" 91A. (a) the contract shall, at the option of the company, be void as against the company, and

(b) such agent shall be liable to a fine not exceeding two hundred rupees."

#### STATEMENT OF OBJECTS AND REASONS.

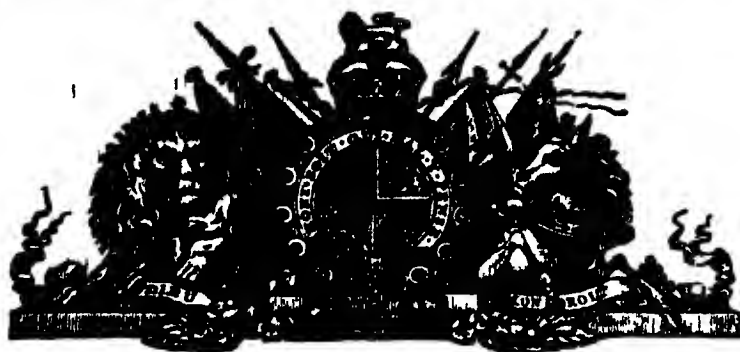

The object of this Bill is to supplement the Indian Companies Act, 1913, in respect of certain matters relating to the internal management of companies. This supplemental legislation was considered desirable by the Select Committee of the latter Bill in view of the system, to a large extent peculiar to India, by which some companies are managed by firms of Managing Agents whose relationship to the companies they manage is different from that of a director to his company in England. The Select Committee was of opinion that, in view of the intrinsic importance of these provisions and the fact that they had not been formally before the country, they should be circulated before taking their place in the law. The provisions of this Bill are designed to secure firstly, that every company should have Directors; secondly, that the majority of the directors of every company shall be independent of the Managing Agents, exception being made in the case of private companies and of companies in which the Managing Agents themselves hold a predominant voting power; thirdly, that interested directors shall disclose their interest in contracts to the other directors, and, in the case of contracts appointing Managing Agents or any variations of such contracts, to the shareholders; fourthly, that in the case of contracts by agents of a company, other than a private company, in which the company is an undisclosed principal, a memorandum in writing of the terms of the contract shall be made and communicated to the company. It is proposed that this Bill should come into operation on the same date as the Indian Companies Act, 1913, namely, on the 1st April, 1914.

## PROSPECTUS OF THE GOVERNMENT COMMERCIAL INSTITUTE.

THE Government Commercial Institute, Calcutta, affords a training of a practical and businesslike character, well up to date and capable of direct application to the commerce and trade of the city. It is neither a business college in which the academic element exceeds the vocational in relative importance nor a secondary school of commerce, but a higher school of commerce in which the vocational element predominates but in a liberal manner.

2. There is a specialised Day Course extending over two years, ending in the Commercial Course Final Examination. Provision is also made for more advanced and more technical instruction by means of evening lectures on Advanced Book-keeping, high speed in Shorthand and Typewriting, Political Economy, Mercantile Law, Annuities and Insurance, and Banking and Currency, ending annually in Commercial Course Special Examinations in each of the subjects. These lectures are intended to give persons already employed in business a chance of improving their efficiency as first-rate Shorthand-writers, Typists or Book-keepers, and of gaining an intelligent insight into the economical, financial or legal principles on which commerce is based.

3. The aim of the Institute is to turn out a type of young man who, if he has received a thorough grounding in the ordinary school subjects, especially in English, has the makings of a useful assistant either in commercial firms or in Government offices generally, and who, if he is destined for commercial life and is willing to avail himself of the facilities offered for more advanced and more technical instruction by means of evening lectures, has the makings of a more useful assistant aspiring to be a businessman.

### THE DAY COURSE.

4. There are two day classes, a first-year class and a second-year class. For the students of these classes the following course of study is prescribed:—

- (1) Modern English, and especially English correspondence, including commercial correspondence, letter drafting and *précis*-writing.
- (2) Arithmetic, including commercial and mental arithmetic.
- (3) One of the following languages, namely, Bengali, Hindi, Urdu, Uriya, French, German or Latin.
- (4) One of the following subjects, namely, book-keeping, shorthand-writing or typewriting.
- (5) Commercial Geography.

5. Arrangements are made to enable those students who may wish to do so to take up two or all of the following subjects, namely, book-keeping, shorthand-writing and typewriting.

6. *English*.—The English teaching is as severely practical as it can be made. In the first-year class, the students regularly practise dictation and essay-writing. They also practise writing easy letters, both official and business, as between a private man and a firm, and making index and *précis* of such letters.

In the second-year class they study the advanced stages of Commercial Practice or Business Methods and are drilled constantly to work out complete transactions, enabling them to appreciate not only the exact relation which one item bears to another but also the place of each in the completed whole, the transactions given in outline furnishing material for unaided work on the part of the students. They now practise making index and continuous *précis*, not only of all the series of letters arising in the transactions given but also of longer official letters and their replies from such bodies as Chambers of Commerce and other Associations. Their papers are corrected and returned soon after they are submitted. No text-books being prescribed, the students are under no temptation to cram, their capacity to write simple correct English with perspicuity and brevity thus developing under careful guidance.

7. *Modern Bengali, including Bengali commercial correspondence, etc.*—In Bengali “Kapalkundala” by Bankim Chandra Chatterjea is prescribed as a text-book affording a model for style and diction. Besides this language work, practices and principles obtaining in the commercial transactions covering different branches are also taught in Bengali, giving the students a further opportunity to learn them and to practise drafting business letters in their mother-tongue. They are required also to make index and *précis* in Bengali of commercial letters.

In order that they may be able to express themselves clearly and accurately in Bengali and in English and with a view more effectively to supplement the practical teaching in English, special attention is paid to translation of passages from English into Bengali and retranslation after some time has elapsed, and *vice versa*.

8. *Commercial Geography*.—The course in Commercial Geography deals specially with the relations of cause and effect that hold good between the general principles of geography and the occurrence, production, and exchange of commodities. It also deals in an elementary way with the history of commodities.

The Commercial Geography text-books used are “Commercial Geography of the World” by A. J. Herbertson, “A Short Commercial Geography” by L. W. Lyde, “Elementary Commercial Geography” by H. R. Mill, and “A School Economic Atlas” by J. G. Bartholomew.

9. *Commercial and Mental Arithmetic*.—In Arithmetic the students are taught addition, subtraction, multiplication and division—simple and compound; approximation in multiplication and division; G. C. M. and L. C. M.; fractions—vulgar and decimal; practice; proportion—simple and compound (*i.e.*, simple rule of three and double rule of three); the metric system; percentages, commission, etc.; proportional division; profit and loss; mixtures; interest—simple and compound; present worth and discount; stocks and shares; exchange—chain rule; square root. Grant and Hill’s “Commercial Arithmetic” and “Mental Arithmetic” are used.

10. *Shorthand*.—During the first year of the course the students are thoroughly grounded in the theory of Pitman’s Shorthand and are expected to attain a speed of 50 words per minute at the end of the year. “Pitman’s Shorthand Instructor” is the text-book used. Throughout the second-year they practise speed. The minimum speed sought to be attained is 80 words per minute. The best students are found to attain a speed of 120 words a minute. In the Final Examination speed tests are held at 80, 100, 120 and 140 words per minute.

11. *Typewriting*.—The “Touch” system of Typewriting is carefully taught from the beginning. No particular text-book is used. The students are required to attain a minimum speed of 30 words per minute at the end of the two years’ course. Dexterous students are found capable of attaining the maximum speed prescribed for the examination, *viz.*, 55 words per minute. The intermediate standard of speed test is 40 words per minute. They have also to pass a tabulating examination corresponding to each speed test.

12. *Book keeping*.—The full course of the Day classes in Book-keeping includes instruction in the elementary stage. It is expected that a student shall have a satisfactory grounding in English and Arithmetic. In this course there is taught a Double Entry system with simple accounts and commercial transactions. Students are taught to open and keep the following books: Journal, Purchase Day Book, Sales Day Book, Cash Book, Bill Book and Ledger. Instruction is also given in making entries for outgoing and incoming single consignments. In connection with these books instruction is given in Trial Balance and preparation of Balance Sheet and Profit and Loss Accounts.

13. The fee is Rs. 3. The text-books which the students have to buy cost about Rs. 16.

14. The classes are held between 11 A.M. and 4 P.M., except on Saturdays, when they are held between 11 A.M. and 2 P.M. Students of typewriting are allowed to stay later for extra practice.

15. The session begins annually about the end of June and closes about the middle of April. The usual Autumn and Christmas holidays are given.

16. Candidates who have passed the “C” class examination of high schools or the Matriculation examination are eligible for admission. Others are admitted, provided they satisfy the Education Department, by passing a

preliminary test examination of a similar standard, that they have sufficient general education to enable them to derive advantage from the teaching.

17. Graduates and Intermediates may be admitted in the second-year class, provided they take up only Typewriting among the subjects mentioned in section (4), paragraph 4. They may be allowed to take up Shorthand or Book-keeping, provided they have sufficient knowledge in Shorthand or Book-keeping, as the case may be.

18. Candidates for admission should send in their applications to the Principal annually before the end of June.

#### THE EVENING COURSE.

The session begins annually about the end of June and closes about the middle of April.

19. There are at present Evening classes for the following subjects: Shorthand-writing, Typewriting and Book-keeping.

20. If classes can be formed, arrangements will be made for the delivery of lectures on Political Economy, Annuities and Insurance, Mercantile Law, Modern English, and Banking and Currency. Fees are paid according to the number of lectures delivered in each subject. Classes were formed last year in all the subjects except Modern English.

21. A student may be a member of one or more classes at his option.

22. *Shorthand*.—Students are admitted in July and also in December every year. The examination is held in April. For the session July to November the fee is Rs. 12, payable in four instalments of Rs. 3 each. Only those having a minimum speed of 60 words per minute are admitted in July. For the session December to mid-April, the fee is Rs. 16, payable in four instalments of Rs. 4 each. Those having a speed of 80 words a minute or more are admitted in December. Speed classes are so held as to enable a student to attain any of the four grades of speed required for the Special Examination, viz., 80, 100, 120 and 140 words per minute. There is no Theory class in the evening. The class sits at 6 P.M. daily (except on Saturdays and holidays).

23. *Typewriting*.—Beginners are admitted in July. They are carefully taught the "Touch" system. Advanced students are also admitted in this session. In December, only students having a speed of at least 20 words per minute are admitted. No beginner can join this session. By mid-April, when the examination is held, the minimum speed sought to be attained is 35 words per minute and the maximum is 60 words per minute. There is an intermediate speed test at 45 words per minute. For each of the three speed tests there is a corresponding accuracy test in tabulating, which is carefully taught. The fee is the same as that of the Shorthand class; but a reduction of Re. 1 per instalment of each of the two fees payable by a student, who is simultaneously a member of both the Shorthand and Typewriting classes, is granted, and the same reduction per instalment of each of the three fees payable is made when a student is simultaneously a member of three classes, viz., Shorthand, Typewriting and Book-keeping. The Typewriting class is divided into two groups, the first of which practise from 5 to 6-30 P.M. and the second from 6-30 to 8 P.M. (except on Saturdays and holidays).

24. *Book-keeping*.—The full course of the evening classes in Book-keeping includes instruction in two stages—the Elementary and the Advanced. Preparatory to the Elementary work it is expected that a student shall have a satisfactory grounding in English and Arithmetic—

(a) In the first-year class, ending with the Commercial Course Special Examination in Elementary Book-keeping, the course is similar to that prescribed for the day course.

(b) In the second-year class ending in the Commercial Course Special Examination in Advanced Book-keeping, the course includes matters as under:—

In the advanced stage there is considered the nature of capital, whether as money or property, stocks, shares, classification of capital, revenue accounts, the use of departmental ledgers, also the establishment and recoupment of sinking funds, investment accounts, public, railway, gas and water companies' accounts. Joint-stock companies' accounts are

dealt with completely. Instruction is also given in joint consignments, partnerships, contracts, etc. The nature and purposes of allowances to be made for depreciation in value of property are also made clear.

The fee for the Elementary Book-keeping class is Rs. 24, payable in eight instalments of Rs. 3 each, and that of the other Book-keeping class is Rs. 32, payable in eight instalments of Rs. 4 each. A reduction of Re. 1 per instalment of each of the two fees payable by a student who is a member simultaneously of two of the classes in Shorthand, Typewriting or Book-keeping will be granted, and the same reduction is granted per instalment of each of the three fees payable by a student who is a member simultaneously of three of the classes in Shorthand, Typewriting and Book-keeping.

The fee is Rs. 5 for each Special Examination and Rs. 8 for the Final Examination.

27. *Prizes.*—First and second prizes of Rs. 50 and 25, respectively, are offered by the Bengal Chamber of Commerce for competition by the students of the evening classes in each of the following subjects:—

Modern English, Shorthand, Advanced Book-keeping, Mercantile Law, Banking and Currency, Annuities and Insurance, and Economy.

Three prizes are offered by the Remington Typewriter Company to the three students of the Institute obtaining the highest marks for efficiency in Typewriting.

28. The Commercial Course Final Examination at the end of the two years' Day Course and the Commercial Course Special Examinations in each of the subjects specified for evening lectures at the end of each year are controlled by the Commercial Course Advisory and Examination Board, a body consisting of educational officers and gentlemen engaged in commerce in Calcutta. On the results of these examinations certificates are granted by the Education Department, these certificates being endorsed by the Secretary, Bengal Chamber of Commerce, which body, as also the Bengal National Chamber of Commerce, have undertaken to publish the list of the successful candidates.

29. Up till now the Institute has turned out 279 successful candidates in the Final and Special Examinations. All of these are now employed in various offices, both mercantile and Government. A good many of them, viz., those that had joined either the Day or Evening classes with a tolerably fair grounding in English and could, therefore, make the best use of the training received here, have risen above the level and are now drawing from Rs. 60 to Rs. 120, some of them having even received two or three increases in the course of a year and are reported to be shaping very well in their respective spheres.

30. The Bengal Chamber of Commerce has recently issued a circular letter containing a request to its members to make it a rule to take the

passed students of the Day classes, whenever possible, in preference to other clerks.

In its Notification No. 4122Mis., dated the 24th November 1911, the Government has recognised the comprehensiveness and thoroughness of the course of studies prescribed for our Final Examination by adopting it, with slight elimination and addition, for the Secretariat Clerical Service Examination, and has declared our successful candidates in the Final Examination as eligible to appear for it along with those who have passed the Intermediate and higher examinations of an Indian University.

31. Candidates for admission should send in their applications to the Principal annually before the end of June.

15 (e).—Officers, who have been promoted from temporary employment in the Settlement Department or in other work of a similarly arduous nature, and who continue in such work after their appointment to the Executive Branch of the Provincial Civil Service, will be exempted from passing the Lower Standard of Departmental Examination and will be eligible for confirmation and promotion, provided they are otherwise qualified. Officers of this class, who are retained in Settlement or other work indicated above, will also be exempted from passing the Higher Standard so long as they remain on such work. But no officer shall benefit by this exemption for a period of more than three years. At the end of three years every officer, who has not passed the Higher Standard of examination, will ordinarily be transferred to the general line and receive no further promotion till he passes the Examination.

15 (f).—Officers, other than those mentioned in the preceding clause, should not ordinarily be deputed to Settlement work or duties of a similarly arduous nature till they have passed the Departmental Examination completely by both Standards. When, however, an officer, who has not passed his examination, is employed on such duties, Government will be prepared to consider the question of suspending his liability to pass the examinations until he is relieved of those duties and of allowing his promotion or confirmation to go on as if he had passed. The case of each such officer will be reported to Government and will be considered on its own merits. An officer, temporarily exempted under this rule, will, on being relieved of his duties, be required to pass completely at the first or second \* Departmental Examination following his relief, and if he cannot do so, his promotion or confirmation will then be regulated in accordance with the ordinary rules.

J. G. CUMMING,

## PROSPECTUS OF THE GOVERNMENT COMMERCIAL INSTITUTE.

THE Government Commercial Institute, Calcutta, affords a training of a practical and businesslike character, well up to date and capable of direct application to the commerce and trade of the city. It is neither a business college in which the academic element exceeds the vocational in relative importance nor a secondary school of commerce, but a higher school of commerce in which the vocational element predominates but in a liberal manner.

2. There is a specialised Day Course extending over two years, ending in the Commercial Course Final Examination. Provision is also made for more advanced and more technical instruction by means of evening lectures on Advanced Book-keeping, high speed in Shorthand and Typewriting, Political Economy, Mercantile Law, Annuities and Insurance, and Banking and Currency, ending annually in Commercial Course Special Examinations in each of the subjects. These lectures are intended to give persons already employed in business a chance of improving their efficiency as first-rate Shorthand-writers, Typists or Book-keepers, and of gaining an intelligent insight into the economical, financial or legal principles on which commerce is based.

3. The aim of the Institute is to turn out a type of young man who, if he has received a thorough grounding in the ordinary school subjects, especially in English, has the makings of a useful assistant either in commercial firms or in Government offices generally, and who, if he is destined for commercial life and is willing to avail himself of the facilities offered for more advanced and more technical instruction by means of evening lectures, has the makings of a more useful assistant aspiring to be a businessman.

### THE DAY COURSE.

4. There are two day classes, a first-year class and a second-year class. For the students of these classes the following course of study is prescribed:—

- (1) Modern English, and especially English correspondence, including commercial correspondence, letter drafting and *précis*-writing.
- (2) Arithmetic, including commercial and mental arithmetic.
- (3) One of the following languages, namely, Bengali, Hindi, Urdu, Uriya, French, German or Latin.
- (4) One of the following subjects, namely, book-keeping, shorthand-writing or typewriting.
- (5) Commercial Geography.

5. Arrangements are made to enable those students who may wish to do so to take up two or all of the following subjects, namely, book-keeping, shorthand-writing and typewriting.

6. *English*.—The English teaching is as severely practical as it can be made. In the first-year class, the students regularly practise dictation and essay-writing. They also practise writing easy letters, both official and business, as between a private man and a firm, and making index and *précis* of such letters.

In the second-year class they study the advanced stages of Commercial Practice or Business Methods and are drilled constantly to work out complete transactions, enabling them to appreciate not only the exact relation which one item bears to another but also the place of each in the completed whole, the transactions given in outline furnishing material for unaided work on the part of the students. They now practise making index and continuous *précis*, not only of all the series of letters arising in the transactions given but also of longer official letters and their replies from such bodies as Chambers of Commerce and other Associations. Their papers are corrected and returned soon after they are submitted. No text-books being prescribed, the students are under no temptation to cram, their capacity to write simple correct English with perspicuity and brevity thus developing under careful guidance.

7. *Modern Bengali, including Bengali commercial correspondence, etc.*—In Bengali “Kapalkundala” by Bankim Chandra Chatterjea is prescribed as a text-book affording a model for style and diction. Besides this language work, practices and principles obtaining in the commercial transactions covering different branches are also taught in Bengali, giving the students a further opportunity to learn them and to practise drafting business letters in their mother-tongue. They are required also to make index and *précis* in Bengali of commercial letters.

In order that they may be able to express themselves clearly and accurately in Bengali and in English and with a view more effectively to supplement the practical teaching in English, special attention is paid to translation of passages from English into Bengali and retranslation after some time has elapsed, and *vice versa*.

8. *Commercial Geography*.—The course in Commercial Geography deals specially with the relations of cause and effect that hold good between the general principles of geography and the occurrence, production, and exchange of commodities. It also deals in an elementary way with the history of commodities.

The Commercial Geography text-books used are “Commercial Geography of the World” by A. J. Herbertson, “A Short Commercial Geography” by L. W. Lyde, “Elementary Commercial Geography” by H. R. Mill, and “A School Economic Atlas” by J. G. Bartholomew.

9. *Commercial and Mental Arithmetic*.—In Arithmetic the students are taught addition, subtraction, multiplication and division—simple and compound; approximation in multiplication and division; G. C. M. and L. C. M.; fractions—vulgar and decimal; practice; proportion—simple and compound (*i.e.*, simple rule of three and double rule of three); the metric system; percentages, commission, etc.; proportional division; profit and loss; mixtures; interest—simple and compound; present worth and discount; stocks and shares; exchange—chain rule; square root. Grant and Hill’s “Commercial Arithmetic” and “Mental Arithmetic” are used.

10. *Shorthand*.—During the first year of the course the students are thoroughly grounded in the theory of Pitman’s Shorthand and are expected to attain a speed of 50 words per minute at the end of the year. “Pitman’s Shorthand Instructor” is the text-book used. Throughout the second-year they practise speed. The minimum speed sought to be attained is 80 words per minute. The best students are found to attain a speed of 120 words a minute. In the Final Examination speed tests are held at 80, 100, 120 and 140 words per minute.

11. *Typewriting*.—The “Touch” system of Typewriting is carefully taught from the beginning. No particular text-book is used. The students are required to attain a minimum speed of 30 words per minute at the end of the two years’ course. Dexterous students are found capable of attaining the maximum speed prescribed for the examination, *viz.*, 55 words per minute. The intermediate standard of speed test is 40 words per minute. They have also to pass a tabulating examination corresponding to each speed test.

12. *Book keeping*.—The full course of the Day classes in Book-keeping includes instruction in the elementary stage. It is expected that a student shall have a satisfactory grounding in English and Arithmetic. In this course there is taught a Double Entry system with simple accounts and commercial transactions. Students are taught to open and keep the following books: Journal, Purchase Day Book, Sales Day Book, Cash Book, Bill Book and Ledger. Instruction is also given in making entries for outgoing and incoming single consignments. In connection with these books instruction is given in Trial Balance and preparation of Balance Sheet and Profit and Loss Accounts.

13. The fee is Rs. 3. The text-books which the students have to buy cost about Rs. 16.

14. The classes are held between 11 A.M. and 4 P.M. except on Saturdays, when they are held between 11 A.M. and 2 P.M. Students of typewriting are allowed to stay later for extra practice.

15. The session begins annually about the end of June and closes about the middle of April. The usual Autumn and Christmas holidays are given.

16. Candidates who have passed the “C” class examination of high schools or the Matriculation examination are eligible for admission. Others are admitted, provided they satisfy the Education Department, by passing a

preliminary test examination of a similar standard, that they have sufficient general education to enable them to derive advantage from the teaching.

17. Graduates and Intermediates may be admitted in the second-year class, provided they take up only Typewriting among the subjects mentioned in section (4), paragraph 4. They may be allowed to take up Shorthand or Book-keeping, provided they have sufficient knowledge in Shorthand or Book-keeping, as the case may be.

18. Candidates for admission should send in their applications to the Principal annually before the end of June.

#### THE EVENING COURSE.

The session begins annually about the end of June and closes about the middle of April.

19. There are at present Evening classes for the following subjects: Shorthand-writing, Typewriting and Book-keeping.

20. If classes can be formed, arrangements will be made for the delivery of lectures on Political Economy, Annuities and Insurance, Mercantile Law, Modern English, and Banking and Currency. Fees are paid according to the number of lectures delivered in each subject. Classes were formed last year in all the subjects except Modern English.

21. A student may be a member of one or more classes at his option.

22. *Shorthand*.—Students are admitted in July and also in December every year. The examination is held in April. For the session July to November the fee is Rs. 12, payable in four instalments of Rs. 3 each. Only those having a minimum speed of 60 words per minute are admitted in July. For the session December to mid-April, the fee is Rs. 16, payable in four instalments of Rs. 4 each. Those having a speed of 80 words a minute or more are admitted in December. Speed classes are so held as to enable a student to attain any of the four grades of speed required for the Special Examination, viz., 80, 100, 120 and 140 words per minute. There is no Theory class in the evening. The class sits at 6 P.M. daily (except on Saturdays and holidays).

23. *Typewriting*.—Beginners are admitted in July. They are carefully taught the "Touch" system. Advanced students are also admitted in this session. In December, only students having a speed of at least 20 words per minute are admitted. No beginner can join this session. By mid-April, when the examination is held, the minimum speed sought to be attained is 35 words per minute and the maximum is 60 words per minute. There is an intermediate speed test at 45 words per minute. For each of the three speed tests there is a corresponding accuracy test in tabulating, which is carefully taught. The fee is the same as that of the Shorthand class; but a reduction of Re. 1 per instalment of each of the two fees payable by a student, who is simultaneously a member of both the Shorthand and Typewriting classes, is granted, and the same reduction per instalment of each of the three fees payable is made when a student is simultaneously a member of three classes, viz., Shorthand, Typewriting and Book-keeping. The Typewriting class is divided into two groups, the first of which practise from 5 to 6-30 P.M. and the second from 6-30 to 8 P.M. (except on Saturdays and holidays).

24. *Book-keeping*.—The full course of the evening classes in Book-keeping includes instruction in two stages—the Elementary and the Advanced. Preparatory to the Elementary work it is expected that a student shall have a satisfactory grounding in English and Arithmetic—

(a) In the first-year class, ending with the Commercial Course Special Examination in Elementary Book-keeping, the course is similar to that prescribed for the day course.

(b) In the second-year class ending in the Commercial Course Special Examination in Advanced Book-keeping, the course includes matters as under:—

In the advanced stage there is considered the nature of capital, whether as money or property, stocks, shares, classification of capital, revenue accounts, the use of departmental ledgers, also the establishment and reconcoment of sinking funds, investment accounts, public, railway, gas and water companies' accounts. Joint-stock companies' accounts are

dealt with completely. Instruction is also given in joint consignments, partnerships, contracts, etc. The nature and purposes of allowances to be made for depreciation in value of property are also made clear.

The fee for the Elementary Book-keeping class is Rs. 24, payable in eight instalments of Rs. 3 each, and that of the other Book-keeping class is Rs. 32, payable in eight instalments of Rs. 4 each. A reduction of Re. 1 per instalment of each of the two fees payable by a student who is a member simultaneously of two of the classes in Shorthand, Typewriting or Book-keeping will be granted, and the same reduction is granted per instalment of each of the three fees payable by a student who is a member simultaneously of three of the classes in Shorthand, Typewriting and Book-keeping.

25. Candidates who have attended the lectures in the day course will be eligible for admission to the evening course. Modern English, Shorthand, Advanced Book-keeping, Mercantile Law, Banking and Currency, Annuities and Insurance, and Economy.

Three prizes are offered by the Remington Typewriter Company to the three students of the Institute obtaining the highest marks for efficiency in Typewriting.

28. The Commercial Course Final Examination at the end of the two years' Day Course and the Commercial Course Special Examinations in each of the subjects specified for evening lectures at the end of each year are controlled by the Commercial Course Advisory and Examination Board, a body consisting of educational officers and gentlemen engaged in commerce in Calcutta. On the results of these examinations certificates are granted by the Education Department, these certificates being endorsed by the Secretary, Bengal Chamber of Commerce, which body, as also the Bengal National Chamber of Commerce, have undertaken to publish the list of the successful candidates.

29. Up till now the Institute has turned out 279 successful candidates in the Final and Special Examinations. All of these are now employed in various offices, both mercantile and Government. A good many of them, viz., those that had joined either the Day or Evening classes with a tolerably fair grounding in English and could, therefore, make the best use of the training received here, have risen above the level and are now drawing from Rs. 60 to Rs. 120, some of them having even received two or three increases in the course of a year and are reported to be shaping very well in their respective spheres.

30. The Bengal Chamber of Commerce has recently issued a circular letter containing a request to its members to make it a rule to take the

passed students of the Day classes, whenever possible, in preference to other clerks.

In its Notification No. 4122Mis., dated the 24th November 1911, the Government has recognised the comprehensiveness and thoroughness of the course of studies prescribed for our Final Examination by adopting it, with slight elimination and addition, for the Secretariat Clerical Service Examination, and has declared our successful candidates in the Final Examination as eligible to appear for it along with those who have passed the Intermediate and higher examinations of an Indian University.

31. Candidates for admission should send in their applications to the Principal annually before the end of June.

## SCHEDULE I.

## ENACTMENTS EXTENDED TO EASTERN BENGAL.

(See section 3.)

YEAR.	Number.	Short title.	How far extended.	REMARKS.
1	2	3	4	5
<i>Bengal Acts.</i>				
1899	I	The Bengal General Clauses Act, 1899.	The whole Act, so far as it is applicable to— (1) the other Acts specified in this Schedule, and (2) any Bengal Act hereafter passed and extending to Eastern Bengal.	This Act was repealed in Eastern Bengal by the Eastern Bengal and Assam General Clauses Act, 1909 (Eastern Bengal and Assam Act I of 1909). Its re-extension to Eastern Bengal is necessary— (1) in consequence of the proposal to extend thereto the other Bengal Acts specified in this Schedule, and (2) in order to facilitate the working of future Bengal Acts therein.
1909	II	The Bengal Court of Wards (Amendment) Act, 1909.	The whole Act ..	This Act is identical with Eastern Bengal and Assam Act I of 1911. It is proposed to extend it to Eastern Bengal, and to repeal Eastern Bengal and Assam Act I of 1911 there by an entry in Schedule IV.
1910	II	The Bengal Municipal (Amendment and Validation) Act, 1910.	Sections 1 and 2 ...	Section 2 of this Act amends Bengal Act III of 1884 (Municipalities), which is in force in Eastern Bengal. No similar amending Act has been passed for Eastern Bengal, and it is proposed to extend sections 1 and 2 of the Act thereto, in order to assimilate the law as to Municipalities in Eastern and Western Bengal.
1911	II	The Bengal Vaccination (Amendment) Act, 1911.	The whole Act ...	This Act amends Bengal Act V of 1890, which is in force in Eastern Bengal. No similar amending Act has been passed for Eastern Bengal, and it is proposed to extend the Act thereto, in order to assimilate the vaccination laws in Eastern and Western Bengal.
1911	V	The Calcutta Improvement Act, 1911.	Section 82, and section 86 in so far as it affects section 82.	Although this Act mainly extends only to the Calcutta Municipality and certain neighbouring areas, section 82, and section 86 (in so far as it affects section 82), extend to the whole Province of Bengal as constituted when the Act was passed. Eastern Bengal having since been added to Bengal, it is proposed to extend these sections to the former area.

Sections 5, 8, 10 and 16 of Eastern Bengal and Assam Act I of 1907 differ from the corresponding sections of Bengal Act II of 1906. The former sections being considered preferable to the latter, it is proposed to extend the former Act to Western Bengal, and to repeal the latter Act there by an entry in Schedule IV.

It is therefore proposed to extend the Act to Western Bengal, and to repeal Bengal Act III of 1906 there by an entry in Schedule IV. Section 3 of Bengal Act III of 1907 having declared that Bengal Act III of 1906 shall not apply to any Municipality, constituted under the Bengal Municipal Act, 1884, in which the Calcutta Suburban Police Act, 1886, is in force, it is proposed, in the proviso to clause 4 of the Bill, to make a similar declaration in respect of Eastern Bengal and Assam Act II of 1907.
1909	I	The Eastern Bengal and Assam General Clauses Act, 1909.	The whole Act, so far as it is applicable to the other Acts specified in this Schedule.	The extension of this Act to Western Bengal is consequential upon the proposal to extend thereto the other Eastern Bengal and Assam Acts specified in this Schedule.
1912	III	The Eastern Bengal and Assam Military Police Act, 1912	The whole Act ...	This Act is more up to date than Act V of 1892, and it is proposed to extend it to Western Bengal, and to repeal the latter Act there by an entry in Schedule IV.

## STATEMENT OF OBJECTS AND REASONS.

The main object of this Bill is to assimilate certain enactments in force in Eastern Bengal and Western Bengal, respectively, by—

- (1) extending to Eastern Bengal certain enactments of the Bengal Legislative Council which apply only to Western Bengal,
- (2) extending to Western Bengal certain enactments of the Eastern Bengal and Assam Legislative Council, and
- (3) repealing corresponding enactments which are now in force in the areas affected.

2. The opportunity has been taken to propose the formal amendment of certain enactments in force in Bengal and the repeal of others which are no longer required.

3. Each proposal is explained in column 5 of the Schedules annexed to the Bill. That column is inserted for present convenience, and will be removed before the Bill is passed.

4. Clauses 1 to 6 of the Bill are of a formal character. Clause 7 is required because section 25 of the Bengal General Clauses Act, 1899 (Ben. Act I of 1899), which refers only to "re-enactment", would not be sufficient to continue in force orders and other instruments made under Acts which it is proposed to repeal in order to make way for corresponding Acts of the Eastern Bengal and Assam Legislative Council.

## STATEMENT OF OBJECTS AND REASONS.

In consequence of the introduction of radio-telegraphy into India it has become necessary to amend the Indian Telegraph Act, 1885 (XIII of 1885), in order to enable the possession and working of wireless apparatus to be regulated more strictly than is possible under that Act. The opportunity has been taken to make certain other amendments in the Act, which experience has shewn to be desirable. The details of these amendments are explained in the sub-joined *Notes on Clauses*.

W. H. CLARK.

*The 14th May, 1913.*

*Notes on Clauses.*

*Clause 2.*—The Act at present extends only to British India and to subjects of His Majesty residing in Native States. Following the analogy of the Indian Post Office Act, 1898 (VI of 1898), section 1 (2) of the Telegraph Act has been amended by this clause, so as to extend the operation of the Act to all servants of the King residing in Native States, whether British subjects or not.

*Clause 3.*—The present definition of "telegraph" in section 3 (1) of the Act covers only appliances and apparatus for transmitting or making telegraphic, telephonic or other communications by means of electricity, galvanism or magnetism. It is possible to construct wireless telegraphic apparatus capable merely of *receiving* telegrams, and this clause provides for the amendment of the definition of "telegraph" so as to include apparatus for receiving messages.

*Clause 4.*—The Act as it stands at present, contains no specific provision for regulating the establishment and working of wireless telegraphs on ships. Under section 1 of the English Wireless Telegraphy Act, 1904 (4 Edw. VII, Chapter 21), wireless telegraphic apparatus cannot be installed or worked on board any British ship in British territorial waters without a license granted by the Postmaster General. Licenses granted under this section would probably be possessed by all British ships entering Indian territorial waters. There is, however, no power under the English Act to license ships to use wireless telegraphy in territorial waters outside British territorial waters. Moreover, some provision in the Indian Act is necessary to meet the case of foreign vessels within Indian waters. It is, therefore, proposed to add a second proviso to section 1 of the Act, taking power to control the establishment, maintenance and working of wireless telegraphs on ships within Indian territorial waters.

Under the existing proviso to section 1 of the Act, the power to grant a license for the establishment, maintenance or working of a telegraph is vested solely in the Governor General in Council. Thus, all applications for licenses, even of the most petty nature, have to be submitted to the Government of India. In the majority of cases, the Government of India are not in a position to examine the applications and the reference to them is a mere formality. It is, therefore, desirable to delegate this power to the "telegraph authority," that is, to the Director-General, such delegation being made subject to such restrictions and conditions as the Governor General in Council may think fit to impose. Provision for this delegation of power has been made in the second addition to section 4 proposed in this clause.

*Clause 5 (proposed new section 19A) and clause 8 (proposed new section 25A).*—Under the existing law (sections 13 and 17 of the Act), local authorities or private owners may require the telegraph authority to remove or alter any telegraph post, etc., standing on their properties. There is, however, nothing in the Act to prevent an owner of property from taking, without giving notice to the telegraph authority, such action with the property as may cause or be likely to cause injury to, or interference with, a telegraph line placed upon or near it. A clause has therefore been inserted in the Bill on the lines of section 8 of the English Telegraph Act, 1878 (41 & 42 Vict., Chapter 76), to prevent the execution without due notice of any work likely to be injurious to telegraph lines or posts (proposed new section 19A). The Bill also provides for the recovery of damages in cases where any works are commenced or carried out without due notice and their execution results in injury to telegraph lines or posts and for the imposition of a fine where telegraphic communication is interrupted by any such work (proposed new section 25A).

*Clause 5 (proposed new section 19B).*—Under sections 10 and 11 of the Act as it now stands, the power to place telegraph lines and posts upon private property is confined to the telegraph authority, that is the Director-General of Telegraphs. It is apprehended that this restriction may hinder the legitimate development of telephone enterprise in India, and a clause has therefore been inserted in the Bill to empower the Governor General in Council to extend, by notification in the *Gazette of India*, to any licensee under section 4, any or all of the powers possessed by the telegraph authority under Part III of the Act.

*Clause 6.*—The importation of wireless telegraphic apparatus into British India, except under a license granted by the Government of India, is prohibited. The necessary apparatus can, however, be manufactured in India, and it would in practice be extremely difficult to

ascertain whether such apparatus was being used for reading radio-telegraphic messages transmitted from Government stations. It is, therefore, considered necessary to impose a severer penalty on the establishment and working of wireless telegraphs without a license than is at present provided for by section 20 of the Act. The opportunity has been taken to substitute the penalty of confiscation for the continuing fine now leviable under that section. This follows section 1 (3) of the English Wireless Telegraphy Act, 1904 (4 Edw. VII, Chapter 24), and forfeiture seems a more suitable penalty to impose than the existing penalty of a continuing fine.

*Clause 7.*—The new section 20A introduced by this clause is merely a reproduction of a part of the existing section 20, which it is proposed to revise (see clause 6), and needs no explanation.

*Clause 9.*—Cases have occurred in which trading firms have distributed advertisements to the public by means of imitation inland telegraph forms and covers with impressions of name and date stamps similar to those used on actual telegrams sent out from Government telegraph offices. The practice causes annoyance to the public, and might be resorted to for fraudulent purposes. It is, therefore, necessary to introduce a new section into the Indian Telegraph Act on the lines of section 64 of the English Post Office Act, 1908 (8 Edw. VII, Chapter 48), prohibiting the imitation of the envelopes, forms and marks of the Telegraph Department.

*Clause 10.*—The addition made by this clause to section 24 of the Act, confers on the Commissioners of Police in presidency-towns the powers exercisable by Magistrates of the first and second class under the proposed new section 19A. This amendment calls for no explanation.

## DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 12th May 1913.

**Summary.**—During the week under review thunderstorms occurred throughout the province accompanied by rain. The rain has done immense good to the standing crops and has greatly facilitated the sowing of jute and *aus* paddy, which is now approaching completion. More rain is, however, wanted. The price of rice shows on the average a slight tendency to rise, probably due to the recent rain. At Tangail, however, the price still stands at 6½ seers to the rupee. Scarcity of fodder and water is reported from some parts of Tippera and scarcity of water is reported from parts of Midnapore, Burdwan and Dinajpur. Cattle-disease is reported from six districts.

CALCUTTA,  
The 10th April 1913.

J. R. BLACKWOOD,  
Director of Agriculture, Bengal.

**DEPARTMENT OF AGRICULTURE, BENGAL.****Third and Final Forecast of the Wheat Crop of Bengal, 1912-13.**

*(Note.—On the average of the five years ending 1910-11, the area under wheat in Bengal represents some 0·8 per cent. of the total area under wheat in India. The ratio of irrigated wheat acreage to the total acreage in (a) British India and (b) the territory now reported on, has, in the five years ending 1910-11, averaged (a) 40·0 and (b) 10·7 per cent., respectively.)*

**Character of the season.**—The chief wheat-growing districts in Bengal are Malda, Murshidabad, Nadia and Pabna. Owing to good rain in September and October sowings generally commenced at the usual time. They were a little late in Malda and in parts of Burdwan and Rangpur owing to want of timely rain. Good showers in the beginning of November generally facilitated the growth of the crop. During December there was no rain, and insufficient rainfall in January adversely affected the growth of the crop. The rainfall in February, being general over the province, improved prospects in some places; but being excessive in other places caused some damage. The season on the whole, though better than last year, has not been up to average.

**Acreage.**—The total area sown with the crop this year as estimated by the district officers is 146,000 acres against 143,000 acres last year.

**Outturn.**—The average of district officers' estimates of outturn per acre works out to 91 per cent. against 85 per cent. of the normal last year. The information available does not justify the adoption of any other estimate. Taking the normal yield to be  $10\frac{1}{2}$  maunds per acre, the total yield is estimated to be 51,200 tons against 46,900 tons last year, or an increase of about 9 per cent.

At the end of April the average price of wheat at the principal marts of the province was Rs. 4 per maund, or 2 per cent. less than the price ruling at the same date last year, and 1 per cent. less than in 1911. The average wholesale price of common rice on the other hand for the province at the end of April was 19 per cent. and 38 per cent. higher than corresponding dates in 1912 and 1911, respectively.

## APPENDIX I.

*Third and Final Forecast of the Wheat Crop of Bengal, 1912-13.*

DISTRICT.	Estimated normal area under wheat.	Estimated area under wheat.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the harvesting generally commenced this year, and whether that date was early, normal or late.	REMARKS BY DISTRICT OFFICERS.
		Last year.	This year.	Last year.	This year.		
1	2	3	4	5	6	7	8
	Acres	Acres.	Acres.	%	%		
Nadia ... ..	23,100	16,100	17,700*	83	83	Middle of March. Normal.	The weather has been favourable. No damage has been done to the crop from any causes.  The increase of area as compared with the estimate in the second forecast is due to revision of figures for Kumar-khali thana.
Murshidabad ... ..	69,300	24,300	27,300	83	93*	Beginning of March. Normal.	Owing to want of rainfall in February and March the growth of the crop was not very favourable and the damage thus caused to the crop is about one anna. Hence the outturn has fallen below the normal.  The increase in area was due to sowing of some paddy lands with wheat, as these lands were not cultivated with paddy for want of rain.
Jessore ... ..	1,700	1,200	1,000	75	83*	End of March. Normal.	Conditions have been favourable for the growth of the crop.
Burdwan ... ..	1,800	2,000	2,000	100	108	March ... ..	The weather has been favourable throughout the district and the growth of the crop was good.
Birbhum ... ..	5,000	4,000	5,000	92	100	Second week of March. Normal.	The weather has been favourable and the outturn is anticipated to be normal.  The increase of area as compared with that of last year is due to good rainfall at sowing time.
Bankura ... ..	5,500	3,700	3,400	83	83	Latter part of March. Normal.	Since the submission of the second forecast there has been nothing special to remark except that the rain in the latter part of February and in the beginning of March caused a light damage to the crop.
Midnapore ... ..	2,600	1,500	1,400	83	75	Beginning of March. Normal.	The weather has been moderately favourable. The anticipated outturn is below the normal owing to rainfall at the harvesting time.
Hooghly ... ..	2,400	1,600	1,700	75	83	First week of April. Normal.	The weather conditions have been fair.  The increase of area compared with that of last year is due to timely rainfall.
Rajshahi ... ..	8,500	7,900	7,600	60	65	Early part of March ...	The weather conditions have been fair.  The outturn estimated has fallen below the normal owing to want of rainfall in December and January.
Dinajpur ... ..	1,000	1,600	1,300	80	57*	Latter part of March; rather late.	The weather has not been favourable. There was excessive rainfall in November, which caused the decrease in area this year. The outturn is anticipated to fall below the normal.
Jaipalguri ... ..	1,000	800	1,100	75	75	Middle of March. Normal.	Poor weather greatly retarded the cultivation at the outset, but the rain favoured the growth afterwards.  Owing to excessive rainfall in November the outturn is below the normal.
Darjeeling ... ..	4,500	4,500	4,500	69	85*	October. Normal ...	The weather has been moderately favourable and the growth of the crop was fair.
Rangpur ... ..	3,000	3,500	3,500	100	100*	First week of March. Normal.	Owing to drought in December and January and insect-pests about 10 per cent. of the crop was damaged, but since then the weather has been favourable and outturn has reached the normal.
Pabna ... ..	16,000	16,000	16,000	80	100	Beginning of March. Normal.	The weather conditions have been fair. There has been no damage from drought, insect-pests or crop disease.
Malda ... ..	60,000	40,000	40,000	90	95*	March. Normal ...	The sowing of the crop was late owing to want of timely rainfall, but this was favourable for the growth.  Since the submission of the second forecast, the weather has not been favourable. Some damage was caused to the crop by the rain of February. Hence the outturn has been shown 5 per cent. less than what was estimated in the second forecast.
Faridpur ... ..	2,000	2,100	2,400	87	90	End of March. Normal.	The weather conditions have been fair. The outturn could not reach the normal owing to want of timely rainfall.
Total ... ..	207,400	143,000	146,000	85	91*

## MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR APRIL 1913.

I. *Character of the season.*—During the month under review, rain fell all over the Province, but was below the average everywhere. The usual rainfall statement is appended.

II. *Progress of agricultural operations.*—Planting of sugarcane and preparation of lands for next season's crops continued during the month. Harvesting of *rabi* crops was nearly finished. Sowings of *bhadoi* crops, which continued during the month, were retarded for a time for want of sufficient rain.

III. *State of standing crops.*—The standing crops were reported to be generally doing well.

IV. *Prospects and probable outturn of harvests.*—The prospects of standing crops were not very favourable for want of sufficient rain. In places they were reported to be withering.

V. *Damage to standing crops.*—Considerable damage was reported to have been done to standing crops in Khulna by *magra* and other insects.

VI. *Condition of agricultural stock.*—The condition of agricultural stock was on the whole good. Cattle-disease was, however, reported from places in Nadia, Murshidabad, Jessore, Khulna, Burdwan, Birbhum, Bankura, Rajshahi, Dinajpur, Rangpur, Dacca, Mymensingh and Noakhali.

VII. *Failure of pasturage and fodder.*—The supply of fodder and water was sufficient except in parts of Pingla thana in the district of Midnapore, and except in the Chandpur subdivision of Tippera, where scarcity of water only was reported since the second week of the month. During the last week of the month water scarcity was also apprehended in Pabna.

VIII. *Prices of food-grains.*—During the second fortnight of the month under review, the price of common rice rose in 12 districts, fell in three, and remained stationary in the rest. It varied from 6 seers a rupee in Darjeeling to 10 seers a rupee in Chittagong.

IX. *Condition of agricultural people.*—The condition of the agricultural population was favourably reported upon.

J. R. BLACKWOOD,

*Director of Agriculture, Bengal.*

**DEPARTMENT OF AGRICULTURE, BENGAL.****Third and Final Forecast of the Spring Oilseed Crops of Bengal, 1912-13.**

*(Note.—On the average of the five years ending 1910-11, the area under linseed in Bengal represents some 7·5 per cent., and that under rape and mustard 22·9 per cent., of the total areas under these crops in British India.)*

**Character of the season.**—The rainfall in September and October was general and sufficient for the sowings of the crops in normal time. The sowings were a little late in Khulna, Malda, Noakhali and in parts of Jalpaiguri, Dacca and Chittagong. There were good showers of rain in the beginning of November, which generally favoured the growth of the crops. This was followed by general drought in December and insufficient rainfall in January which affected the outturn in most districts. The rainfall in February being general over the Province improved prospects; but being generally excessive, it also caused damage in some places. Injury by insects was also reported from Murshidabad, Midnapore, Rangpur, Dacca and Faridpur. The season on the whole has not been uniformly favourable.

**Acreage.**—Oilseeds are grown chiefly in the Dacca, Rajshahi and Presidency Divisions. The total area sown this year with different kinds of oilseeds, excepting til, is estimated at 1,571,000 acres against 1,574,900 acres of last year.

**Outturn.**—The outturn of the different kinds of oilseeds according to District Officers' estimates works out to 90 per cent. of the normal against 84 per cent. of last year.

Taking 6 maunds per acre as the normal rate of yield for linseed, rape and mustard and  $4\frac{1}{2}$  maunds per acre for other oilseeds, the total yield is estimated at 308,900 tons against 289,000 tons of last year.

## DISTRICT REPORTS ON WEATHER AND CROPS

*For the week ending on the 19th May 1913.*

**Summary.**—During the week under review thunderstorms accompanied by rain continued throughout the Province. Although therefore the sowings of the *bhadoi* crops were retarded in April, the conditions are now very favourable. Sowings are approaching completion in the Eastern districts of the Province and are being vigorously prosecuted in the Western districts. The prospects of standing crops are now favourable. More rain is, however, desirable in the districts of Murshidabad, Dinajpur and Rangpur. The price of rice shows an average tendency to rise this week. Scarcity of fodder and water is still reported from parts of Tippera and Midnapore and cattle-disease is reported from nine districts.

RESOLUTION—No. 3002.

READ—

Resolution No. 3832, dated the 7th October 1911

READ ALSO—

A letter from the Director of Public Instruction, Bengal, No. 3272, dated the 24th February 1913

A COMMITTEE was appointed in 1911 as an experimental measure, for a period of three years, to advise the Director of Public Instruction, Bengal, in the selection of drawing books for use in schools and in regard to any other matters touching on Art in which the Education Department is concerned.

The whole question of the teaching of Art in schools and colleges and of the cultivation of the artistic sense of students has recently come under the consideration of Government. His Excellency in Council, while recognizing the value of the services rendered by the Art Committee in this direction, is nevertheless of the opinion that its usefulness would be greatly enhanced by an extension of its hitherto comparatively limited powers and functions. It has therefore been decided to strengthen and enlarge the Committee itself and to entrust it with increased duties and responsibilities. The Governor in Council is accordingly pleased to direct—

- (a) that the Committee shall be styled the Art Advisory Committee and shall be constituted as follows :—

*President.*

The Principal, Calcutta School of Art.

*Members.*

1. The Principal, David Hare Training College.
2. The Inspector of Schools, Presidency Division.
3. The Inspectress of Schools, Presidency and Burdwan Divisions.
4. The Vice-Principal, Calcutta School of Art.
5. E. Thornton, Esq., F.R.I.B.A. ... } Nominated by the Art
6. N. Blount, Esq. ... } Gallery.
7. Babu Gaganendra Nath Tagore.

- (b) that the duties of the Committee shall be to advise the Director of Public Instruction in regard to—

1. Drawing books for use in schools.
2. Curricula for instruction in Art, whether in special institutions or in schools and colleges for general education.
3. The general question of Art teaching in Bengal.

The Committee will in the first instance hold office for two years. The Director of Public Instruction is requested to report each year on the measure of success attained by the Committee in the performance of the duties entrusted to its charge. If any vacancies occur on the Committee the fact should be brought to the notice of Government for necessary action.

ORDER.—Ordered that the Resolution be published in the *Calcutta Gazette* and that a copy be forwarded to the Director of Public Instruction, Bengal.

By order of the Governor in Council,

H. F. SAMMAN,

*Offg. Secy. to the Govt. of Bengal.*

**ANNUAL REPORT OF THE ROYAL BOTANIC GARDEN AND  
OF THE GARDENS IN CALCUTTA, AND OF THE LLOYD  
BOTANIC GARDEN, DARJEELING, FOR THE YEAR 1912-  
1913.**

**ROYAL BOTANIC GARDEN.**

**General.**—The year has on the whole from horticultural point of view been above the average, and, in common with plant growth throughout Bengal, plants in the Royal Botanic Garden have benefited from the exceptionally good weather conditions. Such conditions, however, render the work of keeping the garden in a respectable condition all the more onerous, for during the growing season grass rushes up keeping all garden hands busy mowing and cleaning the roads. While the general conditions were good the garden has not escaped its annual minor catastrophes. Early in the year a violent hailstorm broke, which, in addition to blowing down several trees and breaking branches off numerous others, did considerable damage to the glass-covered houses in the nursery. In all about 150 square feet of glass was destroyed by a storm, the severity of which is not often experienced even in Bengal. Some of the hail-stones measured nearly  $\frac{3}{4}$  inch in diameter, and had it lasted much longer the amount of damage might have been serious.

During the first part of the season the work of repairing and painting these houses and of repairing two bridges over the Shadir Lake, which had become unsightly and dilapidated, was undertaken, and, after the arrival of a light railway which has proved a great labour-saving acquisition, the two rubbish pits referred to in last year's report were filled expeditiously by earth taken from the low-lying river terrace at the east end of the garden. During the rains Division II occupied most of the Curator's time, for much clearing work was necessary to bring this section into a condition corresponding with those adjacent. The work of rivetting the river bank still continues to usurp much time and labour which can ill be spared from proper garden improvements, but if the river is not to have its own way altogether this time must continue for years to be spared. The ingenious device perfected by Major A. T. Gage, i.m.s., Superintendent of the Garden, by which brick embankments are run out in front of places where the river has gained dangerous access and the backwater part is filled in, has done much to save sections of the bank which must otherwise have been destroyed by high tides and storms. This expedient is now being followed generally all along the bank at places which look dangerous, and as the work gains completion less time will be necessary to retain our hold.

The dust problem, though by no means so serious as in the neighbouring roads, becomes at times more or less of a nuisance, for motorists are not always too thoughtful of their speed when they find themselves on a road free from bullock carts and with comparatively few pedestrians. In general, however, they show consideration, and the dust problem has been tackled this year, as formerly, by sprinkling about 2,000 yards of the more frequented roads with petroleum.

Though no record is kept of the number of visitors to the Garden, it has been evident to those who live there that there has of late been a marked diminution in the numbers. Several causes may operate to bring about this decline, but there can be no doubt that, if proper access to the garden were maintained, the number of visitors would greatly increase. Of late years both sides of the river have been rendered relatively impassable by the access of railways, coal depôts, etc., and throughout the year there has been only a very unreliable service by river. Visitors naturally do not care to walk from the College Ghât, which is about 2 miles from the part of the garden to which they mostly repair.

2. **Plant and seed exchange.**—About 80 woody plants representing some 26 species new to, or scarce in, the garden were planted out during the

year and about 70 remain in pots in the nursery. Seven thousand one hundred and fifty-seven plants in all were received, amongst which may be mentioned a collection of orchids from Messrs. Sander & Sons, St. Albans, which is a valuable acquisition to the collection in the Garden. Thirty-three thousand one hundred and eighty-seven plants were sent out, over 12,000 of which were distributed to Local Boards and to the Public Works Department for roadside and arboricultural purposes. Of the remainder many went to Government and charitable institutions and to botanical and horticultural gardens in India and abroad. Amongst the collections which have been distributed may be mentioned a large consignment of *Hedychi*ums to Kew for experiments on paper-making.

The collection and despatch of seeds continue to engage a special department, and this year the distribution has been well maintained. Over 1,726 packets have been received. Those required for the garden were put to the nurseries where they have done well. The seeds of such plants as were not required here have been redistributed, and in all 5,119 packets have gone out during the year. Mr. G. H. Cave, Curator of the Lloyd Botanic Garden, Darjeeling, continues to supply the garden with seeds of Himalayan species, and his services in collection and despatch of particular plants required are efficient and praiseworthy.

3. **Herbarium and Library.**—Collections from all over the world have been presented or purchased for the Herbarium and in all about 14,000 sheets have been added. The Curatorship of the Herbarium was vacant prior to March 1912, and it was not thought advisable for the new incumbent to distribute too freely until he had become acquainted with what the Herbarium actually possessed. Consequently the number of sheets sent out was smaller than usual. At present, however, a large number of sheets are being prepared for distribution, which should easily bring up the number to the annual average. The rearranging, classifying and indexing of books, periodicals and pamphlets have been undertaken and proceed as time permits. During the year the north gallery was widened, and the improvement which now gives working room has been much appreciated.

4. **Publications.**—Since the last report was written no addition has actually been made to the issued list of the Annals of the Royal Botanic Garden, but the Appendix to Volume XI embodying descriptions with plates of new species of *Calamus* by Signor Beccari will shortly appear, as also will a revised index by Major Gage, I.M.S., to species and plates contained in the above volume and in the appendix thereto. Of the Records of the Botanical Survey of India the following have appeared:—Volume IV, No. 7—The Alpine and Sub-Alpine Vegetation of South-East Sikkim, by W. W. Smith, M.A.; Volume V, No. 4—Catalogue of Non-Herbaceous Phanerogams cultivated in the Royal Botanic Garden, Calcutta, by Major A. T. Gage, I.M.S.; Volume VI, No. 1—Piperaceae Novae e Peninsula Malayana, by C. de Candolle.

Volume V, No. 8; Volume VI, Nos. 2, 3 and 4; and Volume VIII, No. 1, are at present in the press.

5. **Financial.**—Of the total allotment of Rs. 72,296 for salaries and establishment Rs. 68,255-9-9 was expended, leaving Rs. 4,040-6-3, of which Rs. 4,002-6 was saved under salaries and Rs. 38-0-3 under establishment. The saving under travelling allowance has been Rs. 76-7 from the allotment of Rs. 1,000. The allotment for regular contingencies, Rs. 8,004 has been expended in full. During the period of nine months in which Government sanction operated, Rs. 9,543-10-2 was spent under contract contingencies out of an annual average total of Rs. 19,700. The revenue paid into the Bank of Bengal was Rs. 655-14, being an increase of Rs. 555-14 over sanctioned estimated receipts.

## CALCUTTA GARDENS.

These comprise the Eden, Dalhousie Square, Curzon and Hastings House Gardens, and the same general remarks in regard to the effect of weather conditions as apply to the Royal Botanic Garden, Sibpur, apply to

these. In the Eden Gardens the chief improvement was undertaken in April, and lasted till the end of June, when, with the aid of the Fire Brigade, the *jheel* which was silted up was emptied and thoroughly cleaned out. The lawn in front of the band-stand has this year been double-trenched and resown with *dubb* grass, and the usual expert attention given to the display of flowers, especially in the Canna Garden which has been extended and raised and in the neighbourhood of which new roads have been laid out.

In addition to the routine work in the Curzon Gardens new drains have been made and the soil taken from the Eden Garden *jheel* has been utilised to raise the lawn on the west side. The Dalhousie Square Gardens have been improved by the laying out of a new road on the south side and, as the bye-laws are only too frequently being set aside by pedestrians to whom short cuts would seem to be of more importance than the amenities of the garden, it is proposed to erect guards to keep such transgressors to the legal paths. No special improvements have been thought necessary at the Hastings House Gardens, and the work there has been purely of a routine character. Barrack-pore Park and Government House Gardens have been given the usual advisory attention. The total allotment for the Calcutta Gardens was Rs. 40,172 and the expenditure amounted to Rs. 39,258-14-2, being a saving of Rs. 913-1-10. The sums collected and paid into the Bank of Bengal as garden revenue amounted to Rs. 389.

### LLOYD BOTANIC GARDEN, DARJEELING.

In spite of the excessive amount of rain which fell and of the snowstorm which visited Darjeeling in March, with unfortunate results to a large number of trees in the district, including some in the Lloyd Botanic Garden, the season under review has been quite favourable from the horticultural point of view. The usual seasonal gardening operations on lawns, beds, walks and in the conservatories were carried out and every endeavour made to add to and to improve the collections of plants and the means of access to the same. Some 224 trees and shrubs were removed from the nursery, where want of space for pots is somewhat felt, and planted in their permanent quarters. The collection and distribution of seeds, plants and bulbs has come to be a special feature of the work undertaken by officers of the Lloyd Botanic Garden, and it is interesting to note that this year the commercial retail value of seeds and plants distributed equals the whole budget allotment for the year. Apart from the ordinary collections of indigenous material sent to Calcutta, the following have been distributed:—Plants 20,804, seedlings 6,426 doz., bulbs 4,462, seeds 1,746 packets. The sum of Rs. 12-8 was paid into the Darjeeling Treasury. Labour has again been scarce and difficult to retain owing to the attraction of better terms offered on extensive works in the neighbourhood and recruitment for operations elsewhere. The Curator has continued to supervise the garden work of Government House and of horticultural operations carried on by the Darjeeling Improvement Fund Committee and to give advice and assistance to various public offices in the town and district.

## DISTRICT REPORTS ON WEATHER AND CROPS

*For the week ending on the 26th May 1913.*

*Summary.*—During the week under report rain fell all over the Province. The fall was heavy in some parts of Eastern Bengal and generally light to moderate elsewhere. Sowings of jute and other *bhadol* crops are now well forward in the Eastern districts and are progressing. Weeding continues briskly in the Western districts. The prospects of standing crops are favourable. More rain is, however still wanted in the Murshidabad district. The price of rice shows a slight tendency to rise this week. Fodder and water are still reported to be scarce in parts of Midnapore. Fodder scarcity is also reported from parts of Tippera. Cattle-disease is reported from nine districts.
